TARGET READINESS CHECK

Australia -> Europe (EU) | EU IPS UV receiver

ITEM	STATUS	NOTE
IPS UV profile alignment (resource shape)	ready	Ready for demo evidence
National extensions (per Member State)	gap	Member-state extensions out o...

Receiver handover notes

European IPS readiness view; member-state-specific extensions are intentionally out of scope for the demo.

The report is a readable rendering of the IPS Bundle, not a claim of national certification.

Interoperability note

This PDF is a human-readable rendering. The interoperable source of truth is the HL7 FHIR IPS-style Bundle and its coded Condition, Observation, and MedicationStatement resources. Readiness checks are shown for judge review only; no formal national profile certification is claimed.
