

Independent Clinical and Terminology Review Packet

Status: PENDING INDEPENDENT REVIEW. This packet is not an endorsement until a qualified reviewer completes and signs it.

Review objective	Determine whether each synthetic source phrase was interpreted correctly, assigned an appropriate standard code, and placed in the appropriate FHIR resource.
Case study	Four synthetic Type 2 diabetes exchanges: USA to India, India to USA, Australia to Europe, and Europe to USA.
Not in scope	Production certification, treatment recommendations, privacy certification, and validation on real patients.
Reviewer action	Mark each row Correct, Incorrect, or Needs clarification; add a correction when needed; then complete the attestation page.

Five questions for every row

1. Does the source phrase support the predicted clinical meaning? 2. Is the terminology code appropriate? 3. Are values and units preserved? 4. Is the FHIR resource type appropriate?
5. Would ambiguity require human review?

Route review: USA -> IND

The source report and receiver rendering are synthetic. Review the semantic chain; do not infer that a valid code alone proves the source phrase was mapped correctly.

Source phrase	Predicted meaning	Standard code(s)	FHIR	Correct?	Correction / comment
T2DM	Type 2 diabetes mellitus	SNOMED CT 44054006 ICD-10 E11	Condition	☐ Yes ☐ No ☐ Clarify	
high blood pressure	Hypertension	SNOMED CT 38341003 ICD-10 I10	Condition	☐ Yes ☐ No ☐ Clarify	
A1c 7.8%	Hemoglobin A1c/Hemoglobin.total in Blood	LOINC 4548-4	Observation	☐ Yes ☐ No ☐ Clarify	
Serum creatinine 1.1 mg/dL	Creatinine [Mass/volume] in Serum or Plasma	LOINC 2160-0	Observation	☐ Yes ☐ No ☐ Clarify	
metformin 1000 mg	metformin	RxNorm 6809	MedicationStatement	☐ Yes ☐ No ☐ Clarify	
lisinopril 10 mg	lisinopril	RxNorm 29046	MedicationStatement	☐ Yes ☐ No ☐ Clarify	

Route review: IND -> USA

The source report and receiver rendering are synthetic. Review the semantic chain; do not infer that a valid code alone proves the source phrase was mapped correctly.

Source phrase	Predicted meaning	Standard code(s)	FHIR	Correct?	Correction / comment
sugar disease	Type 2 diabetes mellitus	SNOMED CT 44054006 ICD-10 E11	Condition	☐ Yes ☐ No ☐ Clarify	
high BP	Hypertension	SNOMED CT 38341003 ICD-10 I10	Condition	☐ Yes ☐ No ☐ Clarify	
HbA1c 8.4 percent	Hemoglobin A1c/Hemoglobin.total in Blood	LOINC 4548-4	Observation	☐ Yes ☐ No ☐ Clarify	
Fasting blood sugar 162 mg/dL	Glucose [Mass/volume] in Serum or Plasma --fasting	LOINC 1558-6	Observation	☐ Yes ☐ No ☐ Clarify	
tab metformin 500 mg BD	metformin	RxNorm 6809	MedicationStatement	☐ Yes ☐ No ☐ Clarify	
tab amlodipine 5 mg OD	amlodipine	RxNorm 17767	MedicationStatement	☐ Yes ☐ No ☐ Clarify	

Route review: AUS -> EUR

The source report and receiver rendering are synthetic. Review the semantic chain; do not infer that a valid code alone proves the source phrase was mapped correctly.

Source phrase	Predicted meaning	Standard code(s)	FHIR	Correct?	Correction / comment
T2 diabetes	Type 2 diabetes mellitus	SNOMED CT 44054006 ICD-10 E11	Condition	☐ Yes ☐ No ☐ Clarify	
raised BP	Hypertension	SNOMED CT 38341003 ICD-10 I10	Condition	☐ Yes ☐ No ☐ Clarify	
HbA1c 7.2%	Hemoglobin A1c/Hemoglobin.total in Blood	LOINC 4548-4	Observation	☐ Yes ☐ No ☐ Clarify	
eGFR 78	Glomerular filtration rate [Volume Rate/Area] in Serum, Plasma or Blood by Creatinine-based formula (CKD-EPI 2021)/1.73 sq M	LOINC 98979-8	Observation	☐ Yes ☐ No ☐ Clarify	
Metformin XR 1 g mane	metformin; extended release noted in source	RxNorm 6809	MedicationStatement	☐ Yes ☐ No ☐ Clarify	
perindopril 4 mg	perindopril	RxNorm 54552	MedicationStatement	☐ Yes ☐ No ☐ Clarify	

Route review: EUR -> USA

The source report and receiver rendering are synthetic. Review the semantic chain; do not infer that a valid code alone proves the source phrase was mapped correctly.

Source phrase	Predicted meaning	Standard code(s)	FHIR	Correct?	Correction / comment
Typ-2-Diabetes / type 2 diabetes	Type 2 diabetes mellitus	SNOMED CT 44054006 ICD-10 E11	Condition	☐ Yes ☐ No ☐ Clarify	
arterielle Hypertonie / arterial hypertension	Hypertension	SNOMED CT 38341003 ICD-10 I10	Condition	☐ Yes ☐ No ☐ Clarify	
Glycated haemoglobin 7.6%	Hemoglobin A1c/Hemoglobin.total in Blood	LOINC 4548-4	Observation	☐ Yes ☐ No ☐ Clarify	
Creatinine 1.0 mg/dL	Creatinine [Mass/volume] in Serum or Plasma	LOINC 2160-0	Observation	☐ Yes ☐ No ☐ Clarify	
metformine 850 mg	metformin	RxNorm 6809	MedicationStatement	☐ Yes ☐ No ☐ Clarify	
ramipril 5 mg	ramipril	RxNorm 35296	MedicationStatement	☐ Yes ☐ No ☐ Clarify	

Independent reviewer attestation

Reviewer name	
Clinical / terminology credentials	
Organization	
Email or professional profile	
Conflicts of interest	
Rows reviewed	____ / 24
Rows accepted without correction	____ / 24
Overall verdict	☐ Appropriate for synthetic demonstration ☐ Revise before use ☐ Unable to conclude
Signature and date	

Required reviewer statement

I reviewed the synthetic evidence identified above. My assessment applies only to the reviewed examples and does not constitute certification, regulatory approval, or validation for clinical deployment.
